Roll No.: 81

Class & Div: TE - B

Title:- Case Study on amazon EC2

Step 3: Configure Instance Details

Configure the instance to suit your requirements. You can launch multiple instances from the same AMI, request Spot instances to take advantage of role to the instance, and more.

Number of instances (i) [Launch into Auto Scaling Group](#) (i)

Purchasing option (i) ☐ Request Spot instances

Step 3: Configure Instance Details

Configure the instance to suit your requirements. You can launch multiple instances from the same AMI, request Spot instances to take advantage of role to the instance, and more.

Number of instances (i) [Launch into Auto Scaling Group](#) (i)

Purchasing option (i) ☐ Request Spot instances

Step 3: Configure Instance Details

Configure the instance to suit your requirements. You can launch multiple instances from the same AMI, request Spot instances to take advantage of role to the instance, and more.

Create [billing alerts](#) to get an email notification when estimated charges on your AWS bill exceed an amount.

The screenshot displays the AWS Management Console interface for an EC2 instance. The left sidebar shows navigation options like EC2 Dashboard, INSTANCES, and ELASTIC BLOCK STORE. The main content area shows the instance details for 'Dev_Web Server 01' (ID: i-4c2c3cff). The instance is in the 'running' state, as indicated by the green circle icon in the 'Instance State' column. A red arrow points to the 'Private IP: 192.168.2.167' field. Below the instance name, there are tabs for Description, Status Checks, Monitoring, and Tags. The 'Description' tab is active, showing various instance attributes such as Instance ID, Instance state, Instance type, Private DNS, Private IPs, VPC ID, Subnet ID, Network interfaces, Source/dest. check, ClassicLink, EBS-optimized, Public DNS, Public IP, Elastic IP, Availability zone, Security groups, Scheduled events, AMI ID, Platform, IAM role, Key pair name, Owner, and Launch time.

Instance: i-4c2c3cff (Dev_Web Server 01)	
Instance ID	i-4c2c3cff
Instance state	running
Instance type	t2.micro
Private DNS	ip-192-168-2-167.ec2.internal
Private IPs	192.168.2.167
Secondary private IPs	-
VPC ID	vpc-d51948d0
Subnet ID	subnet-b3a3d0ea
Network interfaces	eth0
Source/dest. check	True
ClassicLink	-
EBS-optimized	False
Public DNS	-
Public IP	-
Elastic IP	-
Availability zone	us-east-1b
Security groups	Web Server SG, view rules
Scheduled events	No scheduled events
AMI ID	ami-am-hvm-2015.05.1.x86_64-gp2 (ami-60b6c50a)
Platform	-
IAM role	-
Key pair name	Dev Key
Owner	018611290429
Launch time	February 3, 2016 at 7:52:22 PM UTC+5:30 (less than one hour)
